

I am currently subscribing to XM Satellite Radio. It was our choice to pay for this service because we felt it offered more variety and less commercials than what is currently offered through more traditional am/fm stations in our area. We benefit from listening to XM Satellite Radio and its traffic and weather channels as well as music, comedy, news, and opinion channels. We can not find this variety and quality on the regular am/fm stations in my area. We pay for these services and it should not be up to the National Association of Broadcasters to dictate what we are permitted to hear. We respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve. We ask what gives the government the right to limit our choice and what is available to citizens as well. Thank You!
